Winter Storm

### STORM TOTAL SNOWFALL FEBRUARY 1-2, 2004

Low pressure over Nebraska moved across southern Minnesota during the morning of the 1st bringing a few inches of snowfall accumulation. A second, more powerful storm tracked from Missouri into Illinois early on the 2nd. The second storm dropped moderate to heavy snow across east central and south central Minnesota between the evening of the 1st and the evening of the 2nd. Snowfall totals from both storms ranged from 6 inches along a line from Redwood Falls to Mora to a foot across south central Minnesota (see attached graphic). The highest totals included 13 inches in Faribault and 12 inches at St. James, Albert Lea, and Blue Earth. Behind the second system, temperatures plummeted into the single digits and teens below zero. Wind chills dropped into the 30s below zero on the morning of the 3rd.

Winter Storm

Low pressure tracked over western Minnesota during the evening of the 8th. This storm dropped a narrow band of 6 to 10 inches of snow across Swift and Pope counties. Snowfall totals included 10 inches north of Appleton and 9 inches in Glenwood. In addition, northwest winds gusted up to 20 mph after the snowfall ended on the evening of the 8th causing blowing and drifting on roads and in open areas.
